

# FACIAL FILLER

## PRE-SERVICE INSTRUCTIONS

# F A C I A L F I L L E R

- 1 Week Prior:** Avoid use of aspirin or blood thinning medications to decrease the likelihood of bleeding and/or bruising. Tylenol is permitted. Do not discontinue prescription blood thinning medication without the express permission from your prescriber provider.
- 1 Week Prior:** Use necessary prophylaxis for those with a history of viral infection or cold sores if receiving lip or perioral filler injections.
- Day of Service:** Contact our office to reschedule if rash or infection is present at or near the planned injection site(s)
- Day of Service:** Suspend use of make-ups, moisturizers, and lotions on the treatment area(s)
- Day of Service:** Avoid caffeine intake to ensure comfort
