

FACIAL SERVICES

POST-SERVICE INSTRUCTIONS

MICRONEEDLING

BEHAVIORS

Cleansing: Avoid use of washcloths or machine brushes in the first 5 days post-service. Avoid exfoliation. Use of a gentle cleanser as part of a regular routine is permitted.

Product Use: Apply a gentle, non-fragrant moisturizer for 5 days post-service. If the treatment area(s) are irritated, apply twice daily, or more. Avoid the uses of AHA, Retin-A, facial masks and scrubs, waxes, or any other exfoliating products for 5 days. Do not apply any product in the first 12 hours other than water or product provided by your Licensed Medical Aesthetician.

Observation: Minimal peeling is possible. Skin will appear red and right for up to 24 hours. Skin texture should continue to improve in the weeks post-service as collagen continues to form.
